## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1- are rejected under 35 U.S.C. 102(b) as being anticipated by Shimichi (JP 11048856)

3. Shimichi discloses a lamp mounting apparatus, (figs 2,4) an outer panel member mounted on a frame member of a vehicle and defining a part of an outer surface of the vehicle (figs 2,3); lamp unit disposed adjacent to said outer panel, a positioning projection protruding (32) from one of said outer panel member and said lamp unit; a positioning opening formed the other one of said outer panel member and said lamp unit, said positioning hole (40) adapted to receive said positioning projection (32); positioning abutment parts provided in said lamp unit and said outer panel member, and said positioning abutment parts abut one another when said positioning projection has been inserted into said positioning hole, thereby position said lamp unit at a predetermined location along a protruding direction of said positioning projection(32,40); a first temporal fastening member (34)protruding from one of said lamp of engaged parts formed along the protruding direction of unit and said frame member, and having a plurality said positioning projections; and a second temporal fastening member provide in the other one of said lamp unit and engaging part provided in said first temporal said

frame member (44,46), and having an adapted to engage with said engaged parts fastening member.

- Said first temporal fastening member is a shaft-like member having a plurality of projections formed on an outer circumference thereof in circumferential direction thereof manner extending along (32);
- A lamp mounting apparatus according to claim wherein said second temporal fastening member includes an annular member having engaging parts adapted to engage with said projections of said first temporal fastening member, said engaging parts being formed on an inner circumferential surface said second temporal fastening member ((34,44,46);
- A lamp mounting apparatus according to claim wherein said positioning projection is tapered toward a tip thereof, and said annular member formed with an inclined surface in an opening thereof, into which said shaft-like member is inserted, to guide said shaft-like member from the outer circumference toward the center the opening (32, fig 4).
